CARLOS E. GUTIERREZ

FRONT-END ENGINEER | WORDPRESS DEVELOPER

Minneapolis, MN • (651) 726-4998 • c_e_gutierrez@yahoo.com • carlogia.com • LinkedIn

PROFESSIONAL SUMMARY

Front-end engineer and technical web project manager with 10+ years of experience delivering responsive, accessible websites and eCommerce solutions. Hands-on expertise in WordPress, HTML, CSS/SCSS, JavaScript, PHP, WooCommerce, and modern CMS workflows, with experience leading distributed teams, managing ticket lifecycles, troubleshooting integrations, and launching large-scale sites under aggressive timelines. Proven results include delivering a 1,000+ page website in under one month, reducing development time by 15%, and supporting redesigns that reached 60,000 monthly organic visitors.

CORE SKILLS

Front End & CMS: HTML5, CSS3, SCSS/SASS, LESS, JavaScript, jQuery, PHP, React, Tailwind CSS, Bootstrap, WordPress, Elementor Pro, ACF, CPTs, WooCommerce, SuiteCommerce, Handlebars.js

Delivery & Optimization: Technical project management, ticket triage, estimation, QA, launches, migrations, Git, Azure DevOps, WP-CLI, WP Engine, Cloudflare, DNS, Core Web Vitals, WCAG/accessibility, technical SEO

Integrations & Tools: Gravity Forms, Zapier, Google Maps API, reCAPTCHA, GA4, Search Console, Figma, Adobe Creative Cloud, NetSuite, Node.js, PostgreSQL, Python, AI-assisted development

PROFESSIONAL EXPERIENCE

NORTHWING DIGITAL — Hopkins, MN | May 2025–Jul 2026

Web Development Ticket Manager

- Managed the full lifecycle of web development tickets—from requirements gathering and estimation through implementation, QA, deployment, and post-launch support—while maintaining clear client communication.
- Coordinated a distributed four-developer team, assigning work, tracking progress, estimating timelines, reviewing deliverables, and helping launch or enhance 15–20 websites and landing-page projects.
- Delivered a 1,000+ page WordPress website in under one month by building reusable Elementor Pro templates, standardizing content workflows, and coordinating three overseas developers.
- Built and enhanced WordPress and WooCommerce experiences using Elementor Pro, HTML, CSS/SCSS, JavaScript, PHP, ACF, Gravity Forms, and third-party integrations.
- Managed launches, migrations, maintenance, and production troubleshooting with WP Engine, Cloudflare, Git, WP-CLI, DNS tools, Zapier, Google Maps API, and reCAPTCHA.
- Troubleshot JavaScript, API, and dynamic-rendering issues for Canterbury Park and Burns Engineering, collaborating with developers to resolve production problems.
- Improved Core Web Vitals, technical SEO, accessibility, and conversions; used AI-assisted tools to accelerate debugging, implementation, and delivery.

ANCHOR GROUP — Oakdale, MN | Mar 2024–Jan 2025

SuiteCommerce Theme Developer

- Developed responsive SuiteCommerce themes and modules using HTML, SASS, CSS, Handlebars.js, and JavaScript, integrating NetSuite product, inventory, and customer data.

- Debugged UI issues, improved performance and cross-browser compatibility, and managed Git/Azure DevOps workflows, Gulp builds, pull requests, and NetSuite deployments.

PERRILL — Minnetonka, MN | Apr 2021–Sep 2023

Front-End Web Developer

- Translated custom designs into responsive WordPress and WooCommerce experiences using HTML, CSS/SCSS, PHP, JavaScript, ACF, and custom post types.
- Partnered with UX/UI designers, back-end developers, and clients in an agile environment; maintained in-house themes and streamlined support work, reducing development time by approximately 15%.

PROPHASE MARKETING — Eden Prairie, MN | Oct 2019–Apr 2021

Front-End WordPress Developer

- Developed, migrated, and maintained WordPress, WooCommerce, HTML, Bootstrap, and BigCommerce websites from project intake through design, coding, hosting, QA, SEO, and launch.
- Scoped and estimated projects, facilitated client onboarding, gathered requirements and assets, and handled hosting, DNS, maintenance, and production troubleshooting.

HOOKER AND COMPANY — Saint Paul, MN | May 2017–Oct 2019

Web Designer / Developer

- Designed and developed WordPress and eCommerce sites, improved on-page SEO, and maintained client websites; one redesign grew to approximately 60,000 monthly organic visitors.
- Performed QA, migrations, domain and hosting setup, maintenance, and troubleshooting while managing projects within budget and supporting Mailchimp campaigns.

YADA SYSTEMS, INC. — Roseville, MN | Aug 2008–May 2017

Software & Hardware Support Technician

- Provided call-center IT support for LAN/TCP-IP, software, and hardware issues; installed and configured systems, monitored incident queues, and documented troubleshooting steps and resolutions.

SELECTED PROJECT HIGHLIGHTS

- United Theological Seminary: Helped deliver a 120+ page WordPress site with custom jQuery navigation, ACF-driven content, and interactive components; the site attracted roughly 2,500 monthly organic visitors.
- Abrakadabra Environmental: Led template creation and distributed delivery for a 1,000+ page Elementor Pro build completed in under one month.
- Volunteer web work: Built and supported nonprofit and community websites using WordPress, WooCommerce, GiveWP, analytics, SEO, branding, and local-search tools.
